

CNSI Climbs The Healthcare Informatics 100 List

ROCKVILLE, MD – CNSI, a fast-growing provider of innovative IT business solutions for government and commercial enterprises, today announced it has been named to the Healthcare Informatics 100, a list of the industry's top healthcare IT companies.

ROCKVILLE, MD – CNSI, a fast-growing provider of innovative IT business solutions for government and commercial enterprises, today announced it has been named to the Healthcare Informatics 100, a list of the industry's top healthcare IT companies. Based on 2006 healthcare IT revenues, CNSI ranked #45, climbing 15 places from last year's ranking, and was also cited as a "fast-growth company" by the magazine. "For 14 years, the Healthcare Informatics 100 has been used by providers and vendors to identify significant companies in the healthcare IT industry," says Anthony Guerra, editor-in-chief of Healthcare Informatics. "Those organizations that make the list demonstrate a strong commitment to delivering the best products and services." CNSI's growth and success in the healthcare IT market is the result of its Medicaid Management Information System (MMIS) solution, eCAMS. eCAMS is the only J2EE, Web-based MMIS in production today. eCAMS helps states more efficiently collect and analyze valuable patient and financial data that currently reside in dispersed legacy systems, enabling Medicaid officials to identify opportunities for cost reduction and efficiency improvements.

"CNSI is gaining rapid recognition as a 'change agent' and thought leader in MMIS, having brought innovation to a market that hadn't seen it in almost 30 years. Our solution, eCAMS, is widely recognized as the most technologically-advanced system of its kind," said Shailesh Patel, vice president of health and human services, CNSI. "It's not just about the

technology. We are challenging fundamental principles, changing business processes, and offering never-before functionality, all with the intent to make state social services departments more efficient."Healthcare Informatics is a monthly business publication that provides high-quality coverage and commentary to more than 45, 000 healthcare executives involved in the purchase of information systems. Healthcare Informatics' annual list is widely recognized as an industry standard in measuring the success of healthcare IT providers.
