

Contractor seeking tech personnel for DHH Medicaid I-T project in Baton Rouge

BATON ROUGE – The company selected to lead the development and implementation of a new Medicaid Management Information System (MMIS) for the Louisiana Department of Health and Hospitals is seeking qualified I-T personnel to staff the Baton Rouge-based project. Job seekers can apply online at www.cns-inc.com/la-jobs or attend one of two recruitment open houses this month in Baton Rouge and New Orleans. "We have over 40 key positions that we need to fill for the opening phase of this project," said Stephen Smith, senior vice president of CNSI and the Louisiana project director.

BATON ROUGE – The company selected to lead the development and implementation of a new Medicaid Management Information System (MMIS) for the Louisiana Department of Health and Hospitals is seeking qualified I-T personnel to staff the Baton Rouge-based project. Job seekers can apply online at www.cns-inc.com/la-jobs or attend one of two recruitment open houses this month in Baton Rouge and New Orleans. "We have over 40 key positions that we need to fill for the opening phase of this project," said Stephen Smith, senior vice president of CNSI and the Louisiana project director. "Our goal is to find qualified individuals from among the experienced technology professionals working here in Louisiana."

"We're hiring programmers, systems architects and analysts, database managers and conversion specialists, as well as technical writers and quality assurance personnel," Smith continued. "It's a long list of openings. This is a 10-year project that offers some real career opportunities with compensation packages that are very competitive with similar positions in both the private and public sectors." CNSI has set

up a special website where those interested in applying can see the entire list of available positions, job descriptions and requirements. The site is located at www.cns-inc.com/la-jobs. "We want people to visit the website to see exactly what's available and actually apply online if there's a position of particular interest," Smith said.

In addition to the website, CNSI is hosting recruitment open houses in Baton Rouge and New Orleans where those interested can bring their resumes or CVs and interview in person. "We're prepared to make job offers on the spot," Smith said. The CNSI recruitment open houses are each scheduled for 10 a.m. until 8 p.m. on Sept. 14 at the Baton Rouge Marriott, I-10 at College Dr.; and, for New Orleans applicants, on Sept. 15 at the Marriott at 3838 North Causeway Blvd. in Metairie. CNSI, headquartered in Gaithersburg, Md., is a leading provider of healthcare technology-enabled solutions. The company recently completed the development and implementation of similar Medicaid Management Information Systems in the states of Michigan and Washington.
