Newly Merged CNSI and Kepro Raise \$50,000 in Holiday Match Campaign to 'Be the Light' of Hope in Fighting Hunger

Company match donated to No Kid Hungry in the U.S. and SMILE Foundation in India

McLean, VA, February 28, 2023 – CNSI and Kepro, a newly merged leading healthcare technology solutions and services company, raised \$50,000 to fight hunger over the December holidays in the U.S. and India. The funds were raised as part of the company's "Be the Light" employee-employer match campaign to support the global communities where we live and work.

Company employees were invited to *be the light of hope against the darkness of hunger* by donating cash, food, and/or volunteer time to a community food bank or hunger relief organization of their choice. The company committed to a one-for-one match of logged donations and assigned a dollar value for each logged volunteer activity. Match dollars were designated to support [No Kid Hungry](#), a national U.S. campaign run by Share Our Strength that works to end child hunger, and [SMILE Foundation's](#) "Plate Half Full" campaign, which provides midday meals for impoverished children in India.

Over the two-week campaign, employee participation supported hunger relief organizations across 29 U.S. states and the District of Columbia and in multiple locations throughout Tamil Nadu, India.

“Giving back to our communities has long been at the heart of both CNSI and Kepro’s values, first as individual companies and now as one,” said Todd Stottlemeyer, CEO. “Our employees truly embraced this campaign to support hunger relief and education, as they recognize that feeding children’s stomachs is essential to educating their brains for future well-being and success.”

The year-end campaign, an annual event for CNSI in years past, was the first all-employee activity for the newly combined company. CNSI and Kepro merged on December 1, 2022.

About CNSI and Kepro:

CNSI and Kepro merged in December 2022 to help government-sponsored healthcare agencies and payers expand healthcare access, enhance quality, improve health outcomes, and lower costs through the company’s clinical services and provider management, health claims and encounter processing, interoperability, and health analytics services and solutions. Co-headquartered in McLean, Virginia, and Nashville, Tennessee, we align, build, and manage innovative, high-quality, cost-effective solutions that help clients achieve their mission, enhance business performance, and reduce costs, and we provide technology-enabled services that help priority populations remain in the home or community of their choice. The company will rebrand in 2023 under a new name.
