

Going Purple for Alzheimer's Awareness

Here at CNSI we pride ourselves on our innovative approach to technology to solve our clients' most mission critical needs. We especially love when we are able to combine our passion for technology with social good. This month we are proud to support the efforts of the State of Michigan to promote Alzheimer's Awareness – State of Michigan Governor Rick Snyder's [website](#) and official [Facebook](#) and [Twitter](#) are “Going Purple” to raise awareness, and so is the [State of Michigan Community Health Automated Medicaid Processing System \(CHAMPS\)](#). We are hopeful that by sharing this campaign with the millions of our beneficiaries in the Greater Michigan Area we can encourage greater Alzheimer's awareness, earlier diagnoses and a broader dialogue that promotes new ways of thinking about Alzheimer's care and research.

Benefit Plans
Tailor services to your members with our benefit plans features. Benefit plans can support specific managed care programs.

Benefit Service Package
The Benefit service package defines a bundle of services, diagnosis codes and delivery settings. Our system provides the flexibility to maintain complex benefit.

Group Structure
Our flexible group structure provides the flexibility to support exception based processing based on categories of members.

Business Rules Driven Benefits Evaluation Process
Our integrated RuleIT rules engine manages the business rules associated with evaluating the claim against the multiple benefit service plans.
