

iCare: Globally Minded, Locally Committed Corporate Social Responsibility

iCare is more than a Corporate Social Responsibility Program at [CNSI](#) – it is our way of life.

Our mantra – Be Globally Minded and Locally Committed – encourages us to think big and measure our success based on the impact our work has on the lives of each and every individual our company touches from employees and clients to our neighbors near and far. Through persistence, perseverance and passion, CNSI is honored to have helped improve outcomes for over 28 million Americans.

The five pillars of iCare are woven throughout the fabric of everything we do. Improving the everyday lives of our employees, reducing our environmental footprint, maintaining the highest ethical standards in governance, leading philanthropic and volunteer efforts, and to continuously innovate – this is what working at CNSI is all about. It is our philosophy that if we work hard enough, our collective actions will pave the way toward a better future.
