As the single largest source of health care coverage in America, Medicaid is under tremendous pressure to improve health, advance care delivery and reduce costs.

Today, nearly 70% of individuals enrolled in Medicaid are covered by managed care, and this number is growing and including more vulnerable populations. It is expected that by 2018 over 80% of the Medicaid funded services will be purchased through at-risk capitated contracts that integrate acute medical services, behavioral health services and long-term service supports.

To manage performance in this complex environment, CNSI partnered with State agencies and industry groups to develop MC-Track, a flexible Medicaid managed care performance monitoring technology that:

- **Delivers real-time performance metrics of managed plans to improve quality of care;**
- **Enables both regulatory compliance and collaboration to improve quality; and**
- **Provides real-time, web-based communication and visualization for improving accountability and transparency.**

**What is MC-Track?**

MC-Track (Managed Care-Track) is an Advanced Managed Care Contract Management Platform that supports the collaboration between payer (State Medicaid agencies) and health plans. MC-Track delivers a flexible and scalable platform, which enables:

- **Compliance:** Monitoring and oversight of health plans for both regulatory and performance goals
- **Collaboration:** Facilitate bi-directional exchange of information, workflow to track activities to improve quality of care and outcomes
- **Continuous Improvement:** Smart business tags, purpose driven analytical adapters ensure continuous visualization of leading performance indicators to improve plan performance on quality and outcomes measures

**ENSURE VALUE-BASED-CARE THROUGH TRANSPARENCY, ACCOUNTABILITY, AND SMART ANALYTICS**

- Ensures single view of information between health plans and state Medicaid agency through a secure portal.
- Manages and tracks Corrective Action Plans (CAP) through a secure portal.
- Reduces risk for auditing by external agencies (OIG/AIG).
- Tracks, collects, and reports on compliance events for incident management.
- Smart analytics provides comparative analysis, trends, and business insights.
- Integrates financial and performance data and configurable weighting for compressive dashboard and determines value-based payment incentives.

**Track • Collaborate • Analyze**

- Collaboration enables transparency.
- Smart tagging makes compliance actionable.
- Intelligent data capture ensures accountability.

- Manages and provides real-time interface essential financial data (e.g., rates, withhold, incentives, etc.).
- Enables comprehensive view of cost, access, utilization, and quality performance data for range of Health Plans (e.g., MCO, PHIP, PAHP, etc.) and populations including MLTSS and behavioral health.
- Identifies insights and produces actionable intelligence via a plug-in analytic adapter, such as Provider Network Analyzer.

**Align your operations with the proposed Medicaid Managed Care Rule (CMS-2390) using MC-Track on the cloud***

*MC-Track available as Software as a Service (SAAS) on Amazon Cloud*
