

## Improving lives through transformative healthcare technology

We transform and modernize the delivery of public sector healthcare through cloud-based enterprise systems, mobile applications, predictive analytics, situational surveillance, and centralized real-time processing.

### What we do

#### Claims Solutions

Tackle the evolving challenge of claims processing with our secure, modular, scalable, and cost-effective cloud-based platforms.

#### Provider Solutions

Electronically screen, credential, enroll and revalidate provider record information with ease using our comprehensive provider services solution.

#### Consumer Engagement

Meet the new CMS Interoperability Rule using our CMS-certified components and claims access interoperability with FHIR.

#### Data Analytics

Easily integrate your existing data and frameworks with our robust data analytics platforms to improve decision-making with predictive analytics, machine learning, and data visualization tools.

#### Compliance Services

Leverage our configurable and rules-driven approach to reduce operational risk and enable rapid compliance with changing policies and regulations.

#### Business Operations

Enhance your operations with predictive modeling capabilities and seamlessly integrate your existing data and frameworks to produce a comprehensive set of federally required reports.

### Who we serve

We've spent over a quarter century working in partnership with government clients to design the right technology-driven products and solutions for their unique needs.

#### FEDERAL

- Centers for Medicare and Medicaid Services
- Department of Veterans Affairs
- Department of Labor

#### STATE

- Arizona
- Georgia
- Hawaii
- Illinois
- Michigan
- New Hampshire
- Utah
- Washington
- Wyoming
