

EMPOWERING THE DELIVERY OF PUBLIC SECTOR HEALTHCARE

## PROBLEMS WE SOLVE

### HOW CAN I ADDRESS AND RESPOND TO FAST-CHANGING BUSINESS NEEDS?

Extensible platform capabilities enable states to quickly adapt to regulatory changes and public health emergencies (e.g., COVID-19 tracker and visualization tools at state and federal levels). CNSI's comprehensive solution is comprised of a set of fully integrated functional modules that are configurable for each client, powered by evoBrix X™, the leading next-generation modular healthcare platform. CNSI's solution is the only cloud-based, fully modular system available in the market today.

### HOW DO I DRIVE COST SAVINGS AND ENHANCE SECURITY AND SCALABILITY?

CNSI's cloud-enabled platform empowers cost reductions and scalability as the first MMIS solution in the secure public cloud. Washington State saved approximately \$267M by moving their corrections claims to CNSI's cloud-enabled platform. Of the MMIS providers evaluated in the 2020 NASPO ValuePoint™ multi-state module, CNSI is the only Medicaid Enterprise Services provider with sufficient process maturity to be appraised at Capability Maturity Model Integration (CMMI®) Level 4 for Development.

### HOW CAN I ELIMINATE WASTE AND REDUCE IMPROPER BILLINGS?

CNSI's program integrity solutions allow states to generate significant return on investment. Rearchitected "pay-and-chase" construct with new program integrity solution fixes billing inaccuracies before they are sent out the door.

### HOW DO I ENSURE MANAGED CARE CONTRACT COMPLIANCE?

As many states move from fee-for-service to managed care, CNSI's MC-Track™ provides important insights and data to decision makers, enhancing oversight of state MCO contracts. MC-Track™ enables compliance and collaboration with MCO partners for quality performance improvement.

### HOW CAN I ENSURE CLIENT DATA IS RELIABLY AND EFFICIENTLY SHARED?

Provider Directory and Patient APIs powered by CNSI drive seamless movement of health data and empowerment around personal health information. CNSI promotes health literacy with myHealthButton™ data visualization tools designed to improve consumer engagement and experience.

## WHAT WE DO

CNSI is empowering the delivery of public sector healthcare in claims and encounter processing platforms, provider support solutions, and promoting consumer engagement and interoperability. Our configurable, modular, scalable platform, evoBrix X™, powers robust data analytics, risk reduction and regulatory compliance, and fiscal agent operations for our clients.

## PUBLIC SECTOR HEALTHCARE IS OUR FOCUS

CNSI's technology-enabled products and solutions connect consumers, payers, and providers to improve the health outcomes for one in five Americans.
